

State of Rhode Island
Department of Environmental Management
Office of Air Resources

**NOTICE OF PUBLIC
COMMENT PERIOD**

The Office of Air Resources offers an opportunity for public comment regarding its proposal to issue a revised Emissions Cap for the following stationary source:

Veterans Administration Medical Center, 830 Chalkstone Avenue, Providence, RI

Emissions Cap No. 113-2011 for the Providence Veterans Administration Medical Center is being revised to address 2 newly installed emergency generators.

The emissions cap was originally issued on 31 October 2006 and the last revision was issued on 4 January 2011.

Air Pollution Control Regulation No. 29 - Operating Permits contains provisions to allow sources to apply for an emissions cap. An emissions cap must be federally enforceable and include some combination of production and/or operational limitations to ensure that emissions are limited by quantifiable and enforceable means. An emissions cap relieves the stationary source from the requirement to obtain an operating permit.

The public comment period for the revised emissions cap will begin today and continue until 17 January 2012. A public hearing for interested persons to appear and submit written or oral comments on the draft emissions cap will be held if requested by 10 or more persons, or by a governmental subdivision or agency or by an association having not less than 10 members. Any interested person may request that a public hearing be held.

Written comments to be considered part of the record must be submitted during the public comment period. Written comments or requests for a hearing may be sent to the Office of Air Resources at the address below until 4:00 PM, 17 January 2012, at which time the public comment period will close.

The draft emissions cap is available for inspection at the Office of Air Resources, 235 Promenade Street, Providence RI from 8:30am to 4:00pm. For more information, contact Richard Younkin at (401)222-2808 (toll free 1-800-752-8088, TTY 711).

Signed this 9th day of December 2011

Douglas L. McVay, Acting Chief
Office of Air Resources
