

RIDEM

WE ARE HIRING

Air Quality Specialist IV

DEM Office of Air Resources

The Office of Air Resources (OAR), within the Rhode Island Department of Environmental Management, is looking to fill an Air Quality Specialist IV position to coordinate, manage, and administer the programs in the Climate Change and Mobile Sources Section. This Section is tasked with the development and implementation of rulemakings, policies and programs aimed at reducing air pollution and greenhouse gas emissions. Through this work, you will carry out OAR's mission for the preservation, protection, and improvement of Air Quality in Rhode Island.

In this position, you will play a key role in expanding existing programs and shaping new regulatory programs, policies, and initiatives. Throughout our work, we seek to incorporate strategies for effective stakeholder engagement and to organize innovative ways to educate and involve the public on air quality and climate issues that affect our lives.

This is an exciting opportunity to join a committed interdisciplinary team of scientists, engineers, managers, and policy leaders in helping shape Rhode Island's framework for addressing air pollution and climate impacts. The work is complex, exciting, and meaningful!

Applicants must possess, at a minimum, a bachelor's degree in engineering, environmental science, meteorology or environmental economics and have seven years' experience working in the field of reducing air emissions from mobile sources and greenhouse gases emissions.

APPLY BY July 30, 2023
