

Attention OWTS Professionals:

Starting on December 1st, 2024, the RIDEM OWTS program will no longer be approving applications without proof of training being provided. This applies for any applications including Alternative or Experimental technologies which require training.

When submitting any application that meets these requirements, a copy of a current training certification *must* be included in the submittal.

This is a current existing OWTS rule that is being enforced to ensure that all designers will be able to submit to our new database coming within the next year.

Please see the back of this flyer for every technology that requires training along with the specific requirements on each of their certifications. All certifications can be accessed on the Alternative/Experimental Technologies List on our website:

<https://dem.ri.gov/sites/g/files/xkgbur861/files/2024-05/ialist.pdf>

If you do not have current training with these technologies, contact the Vendors for on-demand or scheduled training for most of these technologies.

If you do not have a copy of your training certifications or cannot find it, all applications will be returned unacceptable past this date. Please contact the respective Vendors of each technology to obtain proof of training.

If you have any questions, please contact Ryan Brock at 401-537-4205 or ryan.brock@dem.ri.gov.
