

# REPORT TAGGED LOBSTERS

If you find a lobster with a green “SNECVTS” t-bar tag behind the carapace or a black acoustic tag on the carapace, please contact:  
**Michael Long at (401) 515-4892 or [mlong@cfrfoundation.org](mailto:mlong@cfrfoundation.org)**

This tagging program is part of the Southern New England Cooperative Ventless Trap Survey (SNECVTS) being conducted from May - November 2018 by the Commercial Fisheries Research Foundation and University of Rhode Island. SNECVTS will collect baseline data on lobster and Jonah crab abundance and distribution in the RI/MA Wind Energy Area, which is centered on Cox's Ledge. For more information on SNECVTS, visit: [www.cfrfoundation.org/snecvts/](http://www.cfrfoundation.org/snecvts/)

**REPORT:** Date, Location, Tag #, if Lobster was Harvested or Released.

***If a black acoustic tag is on the lobster, DO NOT RELEASE THE LOBSTER!***

**CASH REWARDS:** Each t-bar tag reported results in one raffle entry. Three \$100 raffle winners will be selected in February 2019. Each acoustic tag returned to CFRF results in an immediate \$100 reward.
